**As the Crow Flies** Gail Hartman,1993-09-30 A look at different geographical areas from the perspectives of an eagle rabbit crow horse and gull      **As the Crow Flies** ,2016      **Scale and Distance in Maps** Julia J. Quinlan,2012-01-15 Without a scale the people reading a map could only hazard a guess as to whether the distance between two points on it is a matter of a few hundred feet or a few hundred miles This useful book teaches kids how to use a map scale to determine distance both as the crow flies and based on a particular route It also discusses working with map grids and using a map to plan a trip      *As the Crow Flies* Kitty Higgins,2004 A math class races from school to City Hall One team travels as the crow flies using a compass The other team uses a map Which team will win      **As the Crow Flies** Priya Raghubir,2015 Consumers make distance judgments when they decide which store to visit or which route to take However these judgments may be prone to various spatial perception biases While there is a rich literature on spatial perceptions in urban planning and environmental and cognitive psychology there is little in the field of consumer behavior In this article we introduce the topic of spatial perceptions as an area of research in marketing We extend the literature on spatial perceptions by proposing that consumers use the direct distance between the endpoints of a path or the distance as the crow flies as a source of information while making distance judgments the shorter the direct distance the shorter the distance estimate We study two spatial features that affect direct distance path angularity i e the size of the angle between path segments and path direction i e whether the path retraces back or not We further propose and demonstrate that the direct distance bias is due to the perceptual salience of direct distance and is used by consumers in an automatic manner Theoretical implications for the manner in which consumers process spatial information and the use of cognitive heuristics while making spatial judgments are discussed      *As the Crow Flies* Craig Johnson,2013-05-28 It s the scenery and the big guy standing in front of the scenery that keeps us coming back to Craig Johnson s lean and leathery mysteries The New York Times Book Review The eighth Longmire novel from the New York Times bestselling author Land of Wolves Embarking on his eighth adventure Wyoming Sheriff Walt Longmire doesn t have time for cowboys and criminals His daughter Cady is getting married in two weeks and the wedding locale arrangements have just gone up in smoke signals Fearing Cady s wrath Walt and his old friend Henry Standing Bear set out for the Cheyenne Reservation to find a new site for the nuptials But their expedition ends in horror as they witness a young Crow woman plummeting from Painted Warrior s majestic cliffs Is it a suicide or something more sinister It s not Walt s turf but he s coerced into the investigation by Lolo Long the beautiful new tribal police chief      *As the Crow Flies* Janet Street-Porter,1999 Following in the footsteps of her successful BBC2 1998 series Coast to Coast *As the Crow Flies* describes Janet Street Porter s attempt to walk the 350 miles from Edinburgh Observatory to Greenwich Observatory in a dead straight line She discovers a new way of walking the OS map isn t quite so handy when you can t stray off a line you ve drawn on a map What s more useful is a heavy clearing stick the power of persuasion and the patience of a

**The Novel Map** Patrick M. Bray, 2013-01-31 Focusing on Stendhal G rard de Nerval George Sand mile Zola and Marcel Proust The Novel Map Mapping the Self in Nineteenth Century French Fiction explores the ways that these writers represent and negotiate the relationship between the self and the world as a function of space in a novel turned map With the rise of the novel and of autobiography the literary and cultural contexts of nineteenth century France reconfigured both the ways literature could represent subjects and the ways subjects related to space In the first person works of these authors maps situate the narrator within the imaginary space of the novel Yet the time inherent in the text's narrative unsettles the spatial self drawn by the maps and so creates a novel self one which is both new and literary The novel self transcends the rigid confines of a map In this significant study Patrick M Bray charts a new direction in critical theory
